REPEL BED BUG

Formulated and Enhanced with
Zetrisil[®]
A PROPRIETARY SILICONE QUATERNARY SOLUTION

TO KILL BED BUGS (Adults, Nymphs and Eggs):

For best results, vacuuming surfaces is recommended prior to treatment. Spray bed bugs and eggs directly wherever possible. Apply as a pinstream, coarse spray or low pressure spray for crack and crevice, carpet perimeter, and direct spray applications in and around non-food areas where bed bugs and their eggs may hide or harbor. For example, on and around baseboards, floorboards, millwork, bed frames, headboards, wall hangings, furniture, door and window frames, walls, closets, window treatments, beneath floor coverings, as well as other non-washable items that may come in contact with bed bugs such as luggage, shoes and backpacks. If treating a pet's living environment, spray on and around pet beds, bedding, floors, sleeping areas and furnishings. This product can also be applied with a paintbrush to walls, baseboards, floorboards, behind wall hangings and other similar areas.

USE RESTRICTIONS:

THIS PRODUCT IS NOT FOR USE ON HUMANS OR ANIMALS

- Do not spray product directly on pets.
- Do not use in commercial food/feed processing, preparation, food/feed storage or serving areas.
- Cover or remove exposed food/feed and utensils during treatment, or thoroughly wash before use.
- Remove all pets (including birds) and cover fish aquariums before spraying.
- This product will not stain water-safe fabrics and surfaces, however care should be taken to test an inconspicuous area for staining prior to use.
- Do not allow adults, children or pets to enter treated area until sprays are dry
- Do not apply to plants or crops
- Do not treat areas when occupants are present
- Do not wet articles to the point of runoff or drip
- Do not use treated articles until spray has dried

MATTRESS APPLICATION:

My-Shield[®] Rebel Bed Bug can be directly applied to mattress and box springs surfaces. For porous surfaces such as mattresses and carpet perimeter areas, apply until thoroughly damp but not wet. Infested bed linens should not be treated. These should be removed, tightly sealed in a plastic bag, laundered and dried at high temperatures prior to re-use. Vacuuming surfaces prior to treatment is highly recommended. Using pinstream, coarse or low pressure equipment, spray directly to mattress surface paying special attention to seams, folds, tufts and edges as well as bed frames and box springs where bed bugs harbor. Re-make bed with clean linens prior to reuse.

STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE:

Protect from freezing. Always store this pesticide product in the original container. Store in a cool, dry (preferably locked) place that is inaccessible to children and animals, and in a safe area away from food and pet food.

User Safety Requirements

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with the product. Do not reuse them.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

Users should remove clothing PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
